

# Test EXASolution - the fastest database in the world.

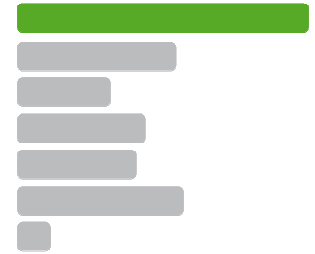

---

We would like to prove to you how easy it is to perform evaluations using EXASolution.

You'll be surprised at just how fast your analyses can be with our high-performance database.

See for yourself the numerous advantages EXASolution has to offer:

- Unlimited analysis options
- Minimum administration overhead
- Simple operation and handling
- Easy connection to existing BI tools
- Fast database management system

## Demo-System - First steps (I)

---

To test EXASolution please register:

<http://www.exasol.com/en/services/demo-system.html>

After you have entered your details and confirmed your e-mail address, a **personalised account** is created for you in the EXASolution database. You will then receive the access data via e-mail.

A separate, empty database model is available to you in the database; there you can create and execute tables, views, functions and scripts. The database also has a "TPC" model that contains test data.

You have **two options** for working with the database.

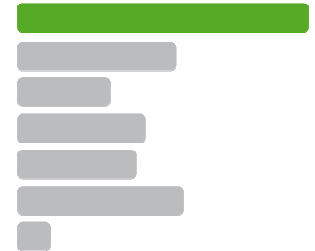

You can:

- Use EXAplus (EXASOL SQL editor) or
- Install one of the EXASOL drivers and connect your own BI front-end to EXASolution

EXAplus, EXASOL drivers and the EXASolution User Manual are available for download at "My EXASOL". Please register there to get full access. <https://www.exasol.com/en/my-exasol/login.html>

After registering and logging in go here for download :

<https://www.exasol.com/en/my-exasol/download-area/version34.html>

## Demo-System - First steps (II)

---

Details on EXAplus usage are available at  
<http://www.exasol.com/en/knowledge-center/clients-treiber/exaplus.html#c2557>

Details on clients are available at  
<http://www.exasol.com/en/knowledge-center/clients-treiber.html#c2674>

The Knowledge Center also contains a series of articles on our technology, SQL constructs and concepts: <http://www.exasol.com/en/knowledge-center.html#c2728>

**Important:** Please note that your demo access is valid for **48 hours**. Should you need to access the system for longer or have any questions, our team of experts will be happy to help: [live-demo\(at\)exasol.com](mailto:live-demo(at)exasol.com)

We would also like to point out that we cannot accept **free mail addresses** for demo access. Thank you for your understanding.
