

Here's What We Need From You

Exasol Web-based Training Courses

Preparing for the Training Course

Remote training courses run from 3 p.m. GMT until 7 p.m. UTC including breaks. We will provide you a link to the WebEx channel before the training starts.

Technical Requirements

Exasol training courses include several hands-on exercises. Therefore, a few things need to be prepared and set up before the training course can start. These include:

- You should have access to a computer or a laptop that has a database client (DB Visualizer, DBeaver, DataGrip, ...) as well as the WebEx client pre-installed
- The database connection string is "edu01.exasol.com:8563" or "edu02.exasol.com:8563"
- Please make sure that the port 8563 is opened in your firewall settings. If you want to test the connection prior to the training, please contact the trainer
- For Administrator courses, your machine need to have at least 16 GB RAM, 80 GB free disk space and VirtualBox pre-installed.

Questions?

If you have any questions prior to the training course, please contact us via training@exasol.com.

We look forward to "seeing" you at the training course.
