

Exasol on AWS

Exasol on AWS is available through the [AWS Marketplace](#) in two variants, depending on how you want to license it.

- **Exasol Analytic Database (Single Node and Cluster, Enterprise Support):** You simply pay for what you use. You are billed through the AWS Marketplace on an hourly basis.
- **Exasol Analytic Database (Single Node and Cluster, BYOL):** You already have a valid Exasol license for the selected configuration or if you plan to purchase an Exasol license separately.

For details on how to use and configure Exasol on AWS please refer to the documentation portal at [Getting Started with Exasol on AWS](#)
