## Product versions and their meaning

We have organized our development to be able to react as flexible and fast as possible to new market requirements.

	Definition	Period	Impact
Major	Major version containing big new features	Every 2-3 years	A migration process is mandatory, since interfaces could have changed
Minor	Updates including small features and bugfixes which do not impact the systems stability	Every 6-12 months	You don't need to change anything, but benefit by the latest bugfixes and features
Bugfix	Contains only bugfixes	Every 2-6 weeks	Only necessary if you are concerned by the bugfixes
