Protect

Protect your investment with EXASOL

Put your confidence in EXASOL and we will make sure your decision is safeguarded and future-proof

Protect

We protect your investment by complementing your IT stack

- By complementing your existing technology stack, we help you protect your existing investments in the technology you're using today
- You do not need to de-install existing solutions, instead you can complement them with EXASOL as a high-speed analytic offload
- We offer a simple migration path to EXASOL, so you can retain existing technology for transactional day-to-day workloads and then run your analytics in EXASOL
- There are no lock-ins with EXASOL, no long contracts you need to sign - so any budget you spend on EXASOL is protected too

We offer a solution that is future-proof and just works

- We offer a straightforward implementation process with EXASOL; the database can be up and running within minutes instead of hours and days
- There is no need to tune the database as it offers automatic self-tuning processes; our customers appreciate the automatic features and little maintenance; it just works
- The database can scale seamlessly from one node to hundreds of nodes; EXASOL is future-proof and will meet your analytic needs as data volumes continue to grow
- We offer one database solution; there are no fork-lift upgrades from one version of the software to the next one, therefore we protect your investment in EXASOL

We back up our solutions with world-class support

- We offer the best-in-class service backed up with the most competent, most professional people in the industry
- We are there for our customers; they are the most important thing to us; our customers' success is our success; our support teams are second-to-none
- Our customers appreciate the close working relationship they have with EXASOL; they appreciate that EXASOL is there to support them with their analytics, BI and reporting needs
- We offer a full free trial of our database solution to test how they can benefit from it. If it is not right, you are free to move on
